

AFTERCARE AND MAINTENANCE

Here at Charlton Brook, we believe that professional landscaping services should extend beyond the initial design and construction of the project. Reliable aftercare and regular maintenance ensure that a site continues to look its best, providing the quality of environment the development and its occupants expect.

Our experienced teams of landscapers have access to a full range of equipment, plus a large and varied stock of trees and plants grown in our own nursery. This ensures immediate availability of plants for replacements and urgent remedial work. We are also experts at maintaining large grassed areas and our staff are fully trained in the safe and effective handling of herbicides.

Team scheduling is handled by our fully staffed office, so that you can depend on us to proactively manage agreed maintenance programmes. Once on site, you can rely on the Charlton Brook staff to carry out work with consideration and attention to detail.

Offer your customers long-life landscaping with Charlton Brook

Our aftercare service is an ideal way for developers to offer ongoing landscaping services to occupants. This allows you to provide a continuing maintenance service after the date of completion. Please contact us for more details.

Charlton Brook has always provided an excellent service. The team is very helpful and accommodating and I would employ them on any development I oversee.

**D Knowland, David Wilson
Homes North Midlands**

Our additional services for developers include:

- ▶ Landscape construction
- ▶ Landscape design
- ▶ Bespoke fencing and decking supply and installation
